ISO 9001 Certified Company

ROHS STATEMENT

Supplier: Teletek Electronics JSC
Address: 14A, Srebarna Str.
1407 Sofia, Bulgaria

The primary purpose of the RoHS Directive (Restriction of Hazardous Substances Directive), which came into force on 1st July 2006, is to ban the placing on the EU market of new electrical and electronic equipment containing more than agreed levels of lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE) flame retardants. With amending of 8 June 2011 came into force Directive 2011/65/EU of the European Parliament and of the Council on the restriction of the use of certain hazardous substances in electrical and electronic equipment Text with EEA relevance.

Teletek Electronics JSC recognises its responsibility to all our customers and to the environment, and has therefore adopted a proactive approach, initiating projects for the introduction of 'lead-free' manufacturing. Our Engineering and Purchasing teams have also been working closely with our suppliers to find economically viable and safe alternatives to all of the substances being phased-out under RoHS.

Our main objective is to convert all of our products (wherever possible) so that they become RoHS compliant and to ensure that our main product lines achieve compliance with the Directive within the projected timeframe.
